EXPLANATORY NOTES

Market Value and Volume of Sales on Registered and Exempted Securities Exchanges

The data presented in this table are of two types depending upon the method of aggregation used by each exchange. Reports of those exchanges marked with an asterisk cover transactions cleared during the calendar month; clearances occur for the most part within five days of the execution of a trade. Reports for other exchanges cover transactions effected on trade dates falling within the report month. The variance introduced by these two different methods of aggregating the data is not considered to be significant and accordingly all registered exchanges are aggregated and reported in monthly summaries.

Stock data include voting trust certificates, certificates of deposit for stocks and American Depository Receipts for stocks.

Bond data have excluded transactions covering United States Government issues since March 1944.

Warrants data include trading in rights for all periods prior to January, 1972.

NOTE: SEE EXPLANATORY NOTES FOR OFFERINGS TABLES.

EXPLANATORY NOTES FOR OFFERINGS TABLES

1971 TO PRESENT 1/

The data included in the Commission's statistical series on securities offerings are a sample of the universe of all securities offered in the United States. This sample includes all primary security issues registered with the Commission for immediate cash sale to the public pursuant to the requirements of the Securities Act of 1933 or Regulation A of that Act. The sample also includes information collected by the Commission on certain private placements as described below. Excluded from the offerings data are all offerings not greater than $100,000; all debt securities with terms of less than one year; all secondary offerings; all non-cash offerings; issues withdrawn after effective registration; issues not defined as securities under Section 2(1) of the Securities Act of 1933; offerings--both public and private--by issuers whose securities are exempted under Sections 3(a)(2)-3(a)(6) and Section 3(a)(11) of the Securities Act of 1933 2/; all employee stock plans; investment company issues other than closed-end shares 3/; intracorporate securities transactions; and sales to foreign purchasers.

The source of data for registered offerings is the registration statement filed with the Commission by the issuer of the securities. (Registration data and offering data are not directly comparable because, beyond the exclusions noted above, the registration date and the offering date may fall in two different monthly or yearly periods.) Data on private placements are collected by a Commission survey of 39 life insurance companies on a monthly basis and 9 more on a quarterly or semi-annual basis, and by reports of private placements filed on the Commission's Form 8-K. Life insurance companies surveyed by the Commission had assets on December 31, 1972, of $190,145 million, or 79% of all life insurance company assets. Only those private placement commitments which are actually executed are included in the statistics. No representation is made that the private placement activity of the life insurance companies surveyed approximates private placement activity as a whole in the United States.

The offerings tables make a distinction between Corporate Offerings and Foreign Government Offerings. It should be noted that Corporate Offerings include issues by non-corporate business enterprises such as limited partnerships, and that the Foreign Government classification includes foreign government issues of all levels, foreign government agencies, and foreign government-owned enterprises.

The industry classification used in the offerings tables should be self-explanatory for the most part. It should be emphasized that the Communication group includes telephone utilities. In the period 1971-73, 98% of the dollar value of the registered issues in this category was accounted for by telephone utilities. The Commerical and Other industry group is comprised of agriculture, contruction, wholesale and retail trade, and all service activities other than financial services.

The security types used in the offerings tables are Bonds, Preferred Stock and Common Stock. The Bonds group includes convertible bonds, which are detailed on a special table. The Preferred Stock group includes convertible preferred stock; however, in the period 1971-73 registered convertible preferred stock accounted for less than 15% of the value of all registered preferred stock. The Common Stock category includes common shares issued by closed-end investment companies (preferred shares are included in Preferred Stock), as well as securities issued by non-corporate business such as certificates of participation and shares of beneficial interest, and other equity securities such as voting trust certifcates and certificates of deposit. American Depository Receipts are not included in the offerings statistics.

All figures are subject to revisions as new information becomes available which requires either an addition to or a correction to data previously published. Revised figures will be indicated with an "R".

1/ Explanatory notes applicable to the offerings data prior to 1971 may be found in Volume 33, pages 45 and 46, of the Statistical Bulletin. The major difference between the pre- and post-1971 data is that until 1971 the securities cited in footnote 2 were included in the offerings statistics.

2/ 3(a)(2) exempts domestic government issues and bank issues,
3(a)(3) exempts securities arising out of current transactions with a maturity not exceeding 9 months,
3(a)(4) exempts securities issued by non-profit and/or charitable groups,
3(a)(5) exempts issues by savings and loan associations,
3(a)(6) exempts issues by companies regulated by the ICC, and
3(a)(11) exempts intrastate offerings.

3/ No investment company shares are included for 1971 and 1972; closed-end investment company shares only are included for 1973. The Commission plans to revise the offerings data to include closed-end shares for the years 1971 and 1972, and when this project is completed, revised tables will be published in the Statistical Bulletin.

NOTE: See Explanatory Notes for Registrations

EXPLANATORY NOTES

Registrations

Data cover all registrations which became effective under the Securities Act of 1933 during the period covered. Issues are included as of the effective date, with the exception of those subject to post-effective amendment to report terms of offering. These are included as of the date of the post-effective amendment.

The classification primary corporate offerings refer to registered offerings for immediate cash sale where the proceeds of the offering are at the disposal of the issuing corporations. Secondary offerings are registrations of outstanding securities where the proceeds of the issue do not accrue to the issuing company. The dollar amount for both type offerings is based generally on the initial offering price. The classification unseasoned common stock includes initial offerings by companies registering common stock for the first time under the Securities Act of 1933, whereas seasoned common stock offerings are registrations by companies previously having securities registered under the 1933 Act. Other equity securities classification consists of offerings of certificates of participation or beneficial interests, warrants or options, voting trust certificates and other equity securities.

Issues to be offered for extended cash sale include investment company issues, and all offerings of employee savings and stock option plans. The classification foreign government is shown separately, whereas registrations by foreign corporations are included in with corporate offerings. Investment company securities include open-end, face-amount and unit trust offerings. Closed-end securities are included in primary corporate offerings.

Issues registered for other noncash purposes such as exchange transactions, securities given for property or services, or reserved for conversion are generally valued at the current market prices.

In order to eliminate double counting, the number of issues are shown for primary and secondary offerings only. However, effective registrations cover all cash offerings, noncash offerings, and offerings for extended cash sale.

Dollar amounts have been rounded and will not add to totals.

EXPLANATORY NOTES

Net Change in Corporate Securities Issued

Estimates of net cash flow in securities are derived by deducting from the amount of estimated proceeds received by domestic corporations through the sale of securities the amount of estimated payments by domestic corporations to investors for securities retired. The figures on total new issues of securities are based on the corporate offering series (appearing on earlier pages of this Bulletin), with certain adjustments. For instance, sales of stock to employees are included, whereas such sales are not covered in the corporate offering series, and a deduction is made from the original data for foreign issues sold in the United States. Also an adjustment is made to deduct from the total offerings the amount of issues which, although they were offered for sale, were not actually sold. The series on retirements covers the same types of issues as in the offerings series, and includes issues retired with internal funds as well as with proceeds from new issues sold for refunding purposes. The series is formed chiefly from individual records of each security issue retired through a cash transaction. The individual records are compiled from announcements appearing in the financial press and statistical services, and are supplemented by data for companies which are required to file periodic reports with the Commission.

The figures are not all-inclusive, but is is believed that the amount of issues omitted is small in relation to the volume covered. It is probable that the deficiencies in the series are of less significance in the post-war period than for earlier years. Certain types of transactions not included in the offerings statistics are unknown sales, such as small private placements, and issues exchanged for assets or other securities of the same type. Furthermore, new issues do not usually include entrepreneurial capital used in forming new firms without resort to outside securities financing, nor is the liquidation of small firms usually included in the retirement data. Purchases of own company stock for servicing options or thrift plans are not treated as retirements. It is probable that many small retirements of small companies may be omitted. To some extent the volume of new issues omitted is compensated by the volume of retirements omitted.

It should be noted that the series omits exchanges and defaults unless they involve cash payments. An exception is made in the case of conversions or exchanges of one type of security for another, such as debentures converted into common stock,which are included in issues and in retirements to the extent known. Although this results in inflated individual totals for issues and retirements, the net cash flow is unaffected, and more accurate data for net debt issues and net stock issues result.

EXPLANATORY NOTES

Revenue, Expense and Balance Sheet of New York Stock Exchange Member Firms Doing a Public Business

The revenue, expense and balance sheet data are received from NYSE member firms pursuant to Rule 416(b)(1) of the New York Stock Exchange which became effective January 1, 1972.

Revenue and expenses are reported on an unconsolidated basis and without adjustments to investment accounts for respondents' equity in profit or share of loss of affiliates or subsidiaries.

Securities Commissions

Commissions earned on all agency equity and debt transactions including principal transactions and net commissions earned on introduced accounts carried by other brokers and on omnibus accounts carried for other brokers.

Realized and Unrealized Gain (Loss) in Trading and Investments

Realized and unrealized gain (loss) from market making activities in securities held for sale in the ordinary course of business and not identified as held for investment. Dividends and interest income on securities in trading accounts are treated as an adjustment to gain (loss) and are not reduced by any allocation of Federal income taxes.

Profit (Loss) from Underwriting and Selling Groups

Gross profit (loss) from management of or participation in underwriting syndicates and selling groups is determined as the difference between proceeds of securities sold and their purchase price and allowances received from or given to other brokers. Any unrealized loss on securities unsold at the time the underwriting account was closed is considered as a deduction from the proceeds of securities sold.

Investment Company Securities Commissions

Income derived from sale of investment company securities as a retailer and as an underwriter.

Margin Interest

Interest on customers' securities and commodities accounts for financing customer margin debits.

Other Revenue not Related To The Securities Business

Miscellaneous other non-securities agency transactions for: variable annuities, placement of savings and loan accounts, fractional interest in oil, gas or other mineral rights, participation in real estate syndications.

All Other Revenue

Revenue from sources related and unrelated to the securities business not included in items listed above.

— sec publications —

Companies registered with the Securities and Exchange Commission under the various Acts are sent copies of individual releases pertaining to rule proposals and rule changes under the Acts for which they are registered. Complete texts of all releases, as well as reports on other aspects of Commission business, are available through a series of publications designed to keep interested firms and members of the public informed about the work of the Commission. The following publications can be ordered from the Superintendent of Documents using the coupon below.

NEWS DIGEST A daily report of Commission announcements, decisions, orders, rules and rule proposals, current reports and applications filed, and litigation developments. ($64.45) per year)

SEC DOCKET A weekly compilation of the full texts of SEC releases under the following Acts: Securities Act, Securities Exchange Act, Public Utility Holding Company Act, Trust Indenture Act, Investment Advisers Act, and Investment Company Act. Also included will be the full texts of Accounting series releases, corporate reorganization releases, and litigation releases. ($43.70 per year)

STATISTICAL BULLETIN A monthly publication containing data on round-lot and odd-lot share volume in stock exchanges, OTC volume in selected securities, block distributions, securities registrations and offerings, net change in corporate securities outstanding, working capital of U. S. corporations, assets of non-insured pension funds, 144 filings and 8K reports. ($28.40 per year)

OFFICIAL SUMMARY A monthly summary of securities transactions and holdings of officers, directors, and principal stock holders. ($61.05 per year)
